\$30,000 Mawarra Superior (AI) (PP) to Yarram Park Herefords

The top-selling bull of our 2020 Sales season.

2020 Sales review: 69 Whiteface bulls sold to \$30,000 averaging \$9,800

Sales include the Mawarra 47th Annual Sale and the 56th Herefords Australia National Show & Sale (Wodonga).

Mawarra Solid Gold (AI) (S)

\$26,000 Robrick Lodge, Parkville, NSW.

Mawarra Star Attraction (AI) (PP)

\$22,000 Guilford, Ouse, Tasmania.

Volume Buyers for 2020

L Wheeler, Wallacedale, Vic.

4 bulls averaged \$11,000.

J Kitschke, Mt Gambier, SA.

4 bulls averaged \$8,000.

McKoy & Son, Holbrook, NSW.

3 bulls averaged \$7,700.

G & E Moutray, Codrington, Vic.

3 bulls averaged \$6,600.

T Stuart, Yarram, Vic.

3 bulls averaged \$4,000.

Coolami Partnership, Melville Forrest, Vic.

2 bulls averaged \$11,000.

P & C Faithfull, Omeo, Vic.

2 bulls averaged \$11,000.

Sleigh Pastoral Co, Ruffy, Vic.

2 bulls averaged \$9,500.

A Mitchell, Wonthaggi, Vic.

2 bulls averaged \$8,000.

M Wiemann, Hill End, Vic.

2 bulls \$6,000 each.

St Katherines Darriman, Giffard, Vic.

2 bulls averaged \$6,000.

Mawarra Genetics 48th Annual Sale

Monday, 22nd March, 2021 at 1 p.m.

91 Whiteface bulls, 26 Angus bulls, 13 PTIC Heifers

BJS Livestock video sale will be interfaced with AuctionsPlus

Directions:

Mawarra is approximately 12 minutes drive from Sale. Travelling from Bairnsdale, take the South Gippsland Hwy to Yarram, at Sale, & turn right at Longford towards Rosedale. Kellys Rd is approximately 8 kms on the right & leads directly into our property. From Melbourne, via Princes Hwy, turn right at the roundabout in Rosedale & take the first left towards Longford. Kellys Road is approximately 19kms on the left.

Accommodation:

Accommodation & transport can be arranged by contacting selling agents or vendors. Local accommodation is featured on page 5.

Airstrip:

Available at Sale airport. Planes will be met on request by agents or vendors.

Refreshments:

Light lunch, morning & afternoon tea will be available from 9.30 a.m. on Sale Day thanks to the Longford Primary School Parents' Club & the Longford Kindergarten Parents.

Inspection:

All cattle can be inspected, by appointment, prior to the sale at Mawarra, Longford, and also from 9 a.m. Sale Day.

Delivery:

Staff from Joe Wilton Transport will be in attendance to co-ordinate deliveries. Stock awaiting delivery will be held free of charge for a period not exceeding one week or, in the case of interstate destinations, until regulation tests have been completed. Every care will be taken, but no responsibility accepted. Sale will be cancelled on any animal failing health tests.

Herd Health:

All bulls have veterinary certificates for breeding soundness & have been treated with Vetmec & Ultravac 7in1. Pestiguard has been administered according to Zeotis guidelines. J-BAS score 6.

No Verbal Instructions:

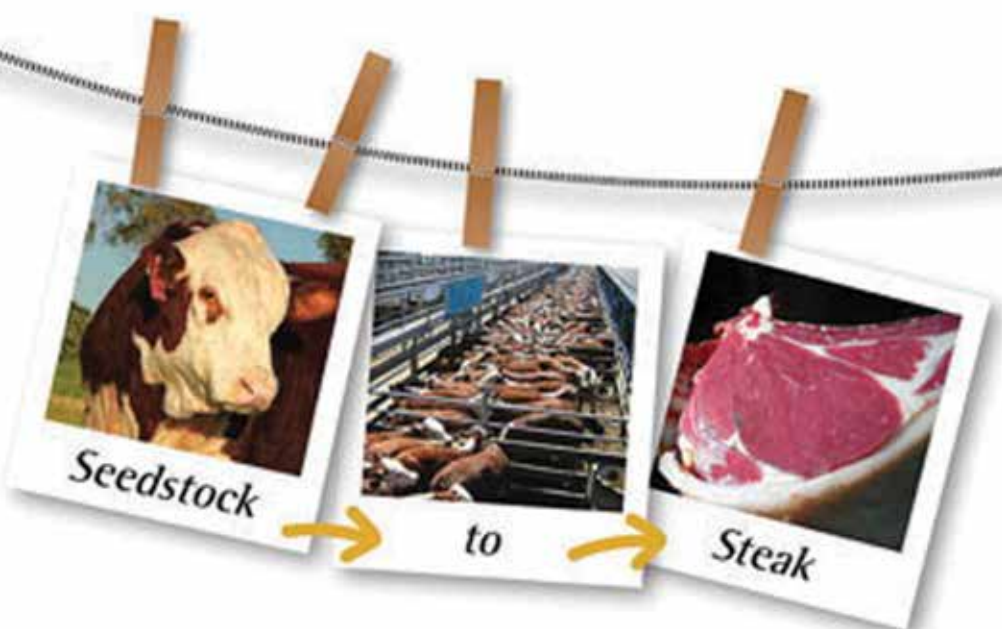

Please fill out the Buyers Instruction Form available on our website prior to the sale, or from the office on Sale Day. Only agents introducing 24 hrs prior to the sale or attending on the day will receive a rebate.

Agents Rebate:

3% payable only to those agents who accompany their clients on Sale Day & co-sign the Buyers Instruction Form. 1% Rebate is available to those agents who introduce their clients in writing by fax or email at least 24 hrs prior to the sale.

Your investment in *#mawarragenetics* improves the eating quality of the meat you produce.

Passion Performance Profit

Supporting your success

At *#mawarragenetics* we work to improve your bottom line.

Australian Hereford Group Breedplan January 2021 *#mawarragenetics* achieved*

- 6 of the top 15 ranked 2019 born horned bulls for **IMF**
- 4 of the top 10 ranked 2019 born horned bulls for **EMA**
- 6 of the top 15 highest-ranked 2019 born horned bulls for **Rib**
- 9 of the top 15 highest-ranked 2019 born horned bulls for **Rump**

We have increased the fats, EMA and IMF in our cattle whilst maintaining the maternal traits and weight-for-age that you have come to expect.

#mawarragenetics will increase...

- Weight-for-age = profit / more \$'s in your pocket.
- Fats, EMA & IMF = satisfied customers = repeat buyers.
- Maternal strength = improve your replacement females.

'...Mawarra Genetics are well and truly on the right track. Their cattle are remaining true to type, present well and hold their own when penned up at any of the major selling centres across the southern states...they have a strong focus on IMF which will only continue to improve.'
Steve Chapman, Southern Livestock Manager, JBS Australia

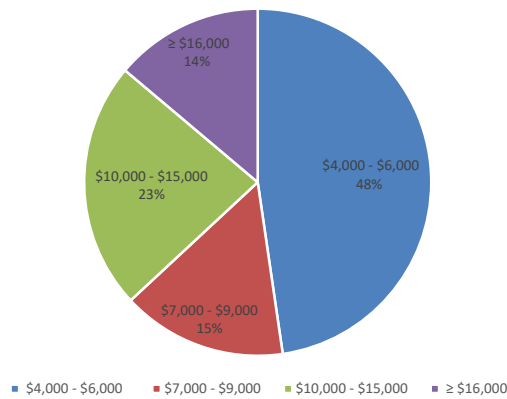

Tick all the boxes before you invest in your next herd sire ...

...consider the #mawarragenetics advantage.

Description of Estimated Breeding Values (EBV)

Calving Ease EBV (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBV's are more favourable and indicate easier calving.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand-mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400 Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the mature Cow Weight EBV.

Milk EBV gives an estimation of the animal's milking ability. For sires, this EBV indicates the effect of their daughter's milking ability, inherited from the sire, on the 200 day weight of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Days to Calving EBV (days) indicates the fertility of the daughters of the sire. It is the time interval between the day when the female is first exposed to a bull in a paddock mating to the day when she subsequently calves. A negative EBV for days to calving indicates a shorter interval from bull-in date to calving and therefore higher fertility.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher-percentage-yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13th rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300kg carcass. These EBV's are indicators of the genetic differences in fat distribution on a standard 300kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300kg carcass. Sires with larger EBVs are expected to produce progeny with higher-yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger (more positive) values are generally more favourable.

HEREFORD Group Breedplan - Average EBVs for 2019 born calves.

GL	Bwt	200	400	600	Milk	SS	Cwt	EMA	Rib	Rump	RBY	IMF	SSR	NSR	SBM	NBT

Hereford Pedigree Abbreviations:

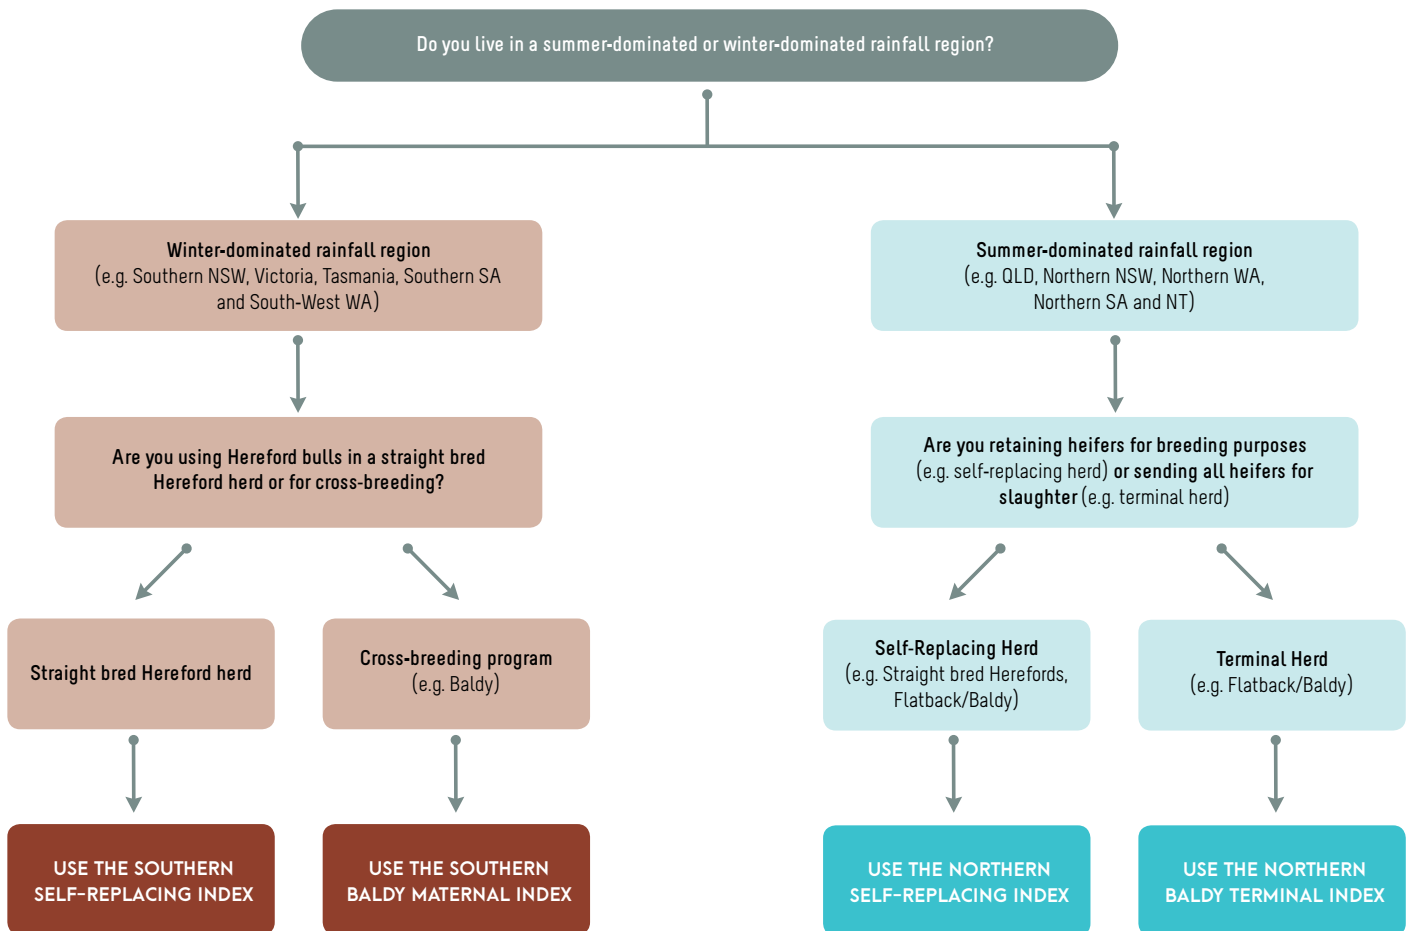

In accordance with Herefords Australia regulations, the following abbreviations appear in the pedigree of animals denoting their horn status.

(H)	=	Horned
(H#)	=	is a horned animal either containing Polled genetics OR missing a percentage of it's four-generation-horned pedigree
(P)	=	Polled
(PP)	=	Homozygous Polled
(S)	=	Scurred (Note: The scurred gene is independent to the polled gene. It gives no indication of the level of horned or polled progeny that will result from this sire.)

DISCLAIMER NOTICE

People entering upon this property for any purpose whatsoever, including attendance of cattle auctions, do so at their own risk. We are not liable to you for personal injury or death suffered by you and/or for the theft, loss of or damage to any personal property caused or contributed to by us or by any other person whether caused or contributed to by our or their negligence, deliberate act or unlawful conduct. "We", "Us" or "Our" refer to the owners, their employees, contractors and agents and each of them. Every care has been taken in compiling this catalogue to ensure accuracy of information supplied, but no responsibility is accepted for any errors which may have occurred.

WHICH INDEX SHOULD I USE?

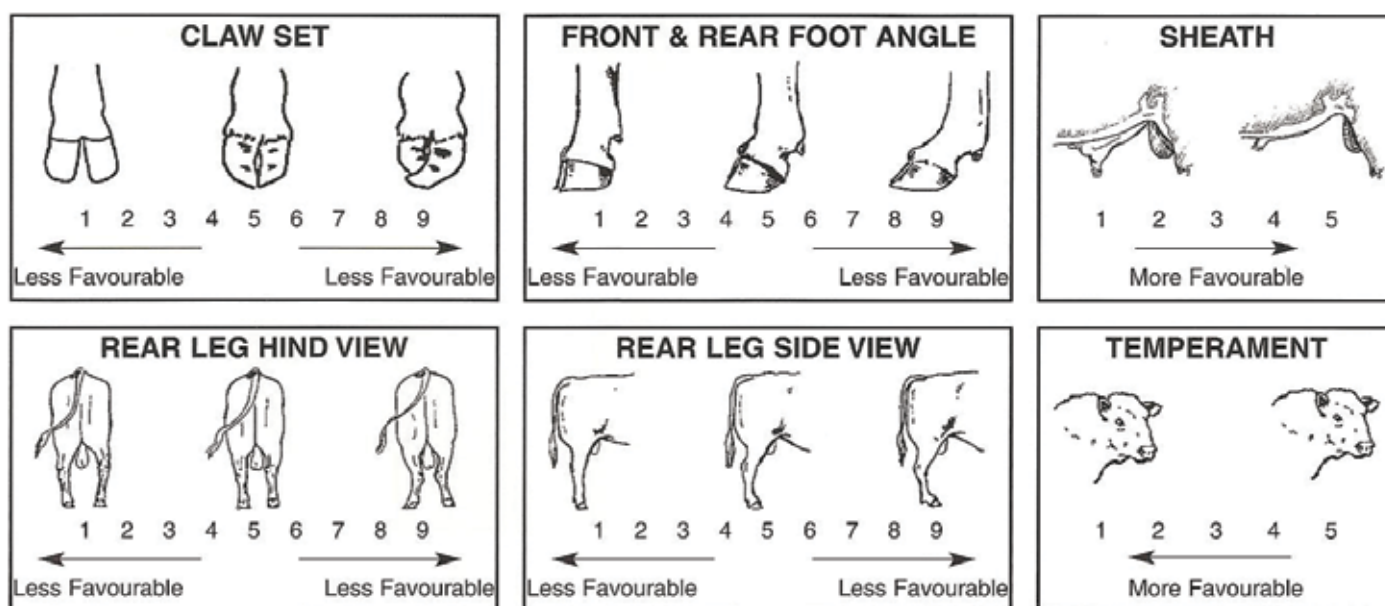

Conditions of Sale

- 1 The highest bidder shall be the purchaser and, in the event of any dispute arising, it shall be settled by the Auctioneer unless one of the claimants will advance, in which case the lots shall be put up again.
- 2 The purchaser shall deposit 25% or the whole of the amount of the purchase money (if required) at any time during the sale.
- 3 All stock shall be paid in cash immediately on conclusion of the sale, and prior to delivery, but, unless other arrangements are specifically agreed in the event of delivery being made or possession obtained by the purchaser or his representative prior to payment of the purchase money, then until payment in full of the purchase money, or any cheques given on account of same of the purchaser to hold the stock as trustee only for the vendor.
- 4 Each lot shall be at the risk and expense of the purchaser immediately upon the fall of the hammer.
- 5 Lots will not necessarily be offered in numerical order.
- 6 All conditions and warranties which might but for this clause be implied by law are expressly negated and excluded. Lots are sold with all faults (if any) and no fault, error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.
- 7 The auctioneers or vendors shall not be responsible for any errors or omissions in any particulars appearing in the description of pedigree of any lot offered for sale, and no error, omission or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.
- 8 The purchaser authorises the auctioneer and/or the auctioneer's clerk to sign on his or her behalf the contract of sale.
- 9 Any statement in the catalogue in relation to a particular cow that has been pregnancy tested as being in calf or to the like effect shall not imply any warranty by the vendor that the cow is in fact pregnant and the purchaser is required to take the risk of the pregnancy or tests being wrong.
- 10 If the purchaser shall neglect or fail to comply with any of the above conditions, any stock purchased by him may be immediately resold by public auction or private contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such re-sale, and shall not participate in any profit accruing therefrom.
- 11 GST: All payments to be made under this agreement are exclusive of GST as that term is used and defined in A New Tax System (Good and Services Tax) Act 1999 (as amended). The purchaser acknowledges that, in addition to all payments payable by the purchaser for all supplies made under this agreement, the purchaser must pay all applicable GST on supplies made.

An explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure:

- A score of **5** is ideal.
- A score of **4 or 6** shows slight variation from ideal, but this includes most sound animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from the ideal.
- A score of **2 or 8** are low-scoring animals and should be looked at cautiously and inspected very closely before purchasing.
- A score of **1 or 9** should not be catalogued and are considered culls.

Eye Setting

5 is very well-hooded eyes set back in head – perfect eye set.

1 is very open eyed - undesirable.

Temperament/Docility

1 is ideal (docile).

3 is less ideal (restless).

5 is aggressive.

Scores of **1** and **2** are preferred.

Scanning: All sale bulls were scanned by **Liam Cardile, Beef Xcel, 14/12/2020**.

Pigment: Each animal is assessed by a Mawarra team member for left/right eye pigment and this is stated in the catalogue.

Scrotal: Scrotal circumferences of all bulls were measured by **Dr Garth Jackson, Traralgon Veterinary Centre, 03/02/2021**.

Soundness: All bulls were assessed for structural soundness by **Liam Cardile, Beef Xcel, 14/12/2020**, prior to selection for sale.

Dr Garth Jackson, Traralgon Veterinary Centre, inspected the bulls on **03/02/2021** for structural and breeding soundness. Certificates will be available from the office on Sale Day.

Begin with the basics, build a strong foundation.

Structural Assessment Scores

The Mawarra herd has always been subject to our own strict evaluation program to assess structural soundness. In line with our objective to record and report on all traits relative to selection, we include for your information an independent structural evaluation. Liam Cardile, BEEF XCEL, completed the structural assessment on the 14th December, 2020.

“An animal with poor structure is like a Rolls Royce without wheels.”

Yarram Unique F181 (H)

Born: 24/03/2015

GH NEON 17N (IMP CAN) (H)

MAWARRA UNIQUE C041 (AI) (H)

MAWARRA MINERVA 554 ET1 (AI) (ET) (H)

BRAYBOOK UPPERCLASS U504 (AI) (H)

YARRAM FLOSSIE A096 (AI) (H)

YARRAM FLOSSIE R065 (AI) (H)

The Unique sire line is one we know well, and trust to continue breeding commercially-elite cattle that fit the demands of modern industry. The necessary traits to achieve this are highlighted by F181's excellent EBVs and (\$)Indexes. He is a trait leader for Milk, EMA, RBY & IMF, and ranks in the top 5% NBT, 10% Rump, SSR, NSR, SBM, 15% SS, Cwt, 20% CEDir & Rib. Arguably his best son at Mawarra, Hugo P190 (page 67), is an excellent example of what this sire line has to offer. Hugo has been exported to New Zealand, the UK and EU with semen packages also sold domestically. We have 51 Unique F181 daughters currently retained in herd. F181's first Mawarra progeny were offered last year. His six sons sold to \$20,000 recording an average of \$12,000. He is represented by another 10 sons in this catalogue (see Lots 6, 19, 20, 24, 49, 51, 52, 53, 54 & 55).

Daybreak is one of the most complete sires we have bred; outcross genetics, sound structure, balance, softness, weight-for-age, carcass and IMF combine with elite maternal genetics. Top 1% Rib & Rump, 5% EMA & IMF. Doreen 225 has sold eight sons to \$20,000, recording an average of \$12,375, and her daughters have sold to \$5,000. Two ET daughters were in the winning 'Pen of Three' at the 2016 World Hereford Conference, Uruguay. We have four daughters currently in herd, three being full sisters to Daybreak. Ironbark Herefords speak highly of his contribution to their herd, with his son topping their 2019 sale at \$22,000. We have 29 Daybreak daughters retained in herd and we are confident his sons, industry-driven, performance-orientated young sires, will add profitability to your program. His 28 sons sold to date, at Mawarra, have topped at \$18,000 (x3) recording an average of \$9,600. We offer seven sons in this catalogue (see Lots 4, 5, 13, 22, 23, 60 & 68).

Exceptional was purchased by Karoonda Herefords at our 2017 Sale for \$29,000, where he sired their \$15,000 top-price bull in 2020. His six sons at Mawarra have sold to \$16,000, recording an average of \$10,700, and his six daughters are all retained. We offer another three sons to you in this catalogue (see Lots 3, 9 & 10).

His EBVs rank in the top 5% EMA, IMF, 10% 600, Cwt, 15% NBT, 20% Mwt, Rib, Rump & SBM.

Emperor L336 sired Australia's 2020 \$100,000 top-selling Hereford bull, Talbalba Emperor P043. Emperor L336 was accepted into the Herefords Australia Young Sire Program, the BIN Progeny Test - 7th Cohort, & the DPI Southern Multi-breed Project. His dam, Minerva 816, is an outstanding female. She is a full sister to international sire, Vice Admiral, and her nine daughters are retained in herd. Her first son, a full brother to Emperor, sold for \$15,000 at the 2017 Herefords Australia National (Wodonga). Emperor is a trait leader for IMF, ranks top 5% for Milk, 20% for 400. Our first five Emperor sons sold to \$13,000 (one at the 2020 Herefords Australia National [Wodonga]) and averaged \$8,800. We have 22 daughters currently in herd. He is represented by Lots 7, 21 & 61 in this catalogue, as well as being a joining sire for a number of the females offered here.

Evolution was purchased for \$32,000 by Graham Genetics at the 2017 Herefords Australia National (Wodonga). His first two Mawarra sons sold in 2020 to \$9,000, and we have twelve daughters retained in herd. Evolution is a trait leader for 600, top 5% 400, 10% Mwt, Cwt, EMA, 15% 200, IMF, 20% SS. Doreen 300's other sons include \$18,000 Black Heart who was purchased at the 2014 Herefords Australia National (Wodonga) by Talbalba and WRL Herefords. A sire line breeding industry-relevant cattle, we used Evolution's son, Influential Q162, during the Spring 2020 joining season. Evolution is represented in this catalogue by Lots 14, 46, 47, 56.

Flying Start's sire, Diamantina, is breeding at Alan Mitchell's, Wonthaggi, with impressive consistency and, as a result, we were keen to retain a son. Flying Start is a heifer's first calf and scanned the largest raw EMA of his drop. Trait leader for 400 & 600 while ranking in the top 1% for EMA & RBV, 5% Mwt & Cwt, 10% 200, 15% SSR & NSR, Flying Start's growth and carcase attributes are all traits required to increase the profitability of a beef-producing enterprise. We have 36 young daughters retained in herd. He is represented by nine sons in this catalogue (see Lots 1, 2, 11, 15, 25, 26, 27, 57, 66) and two daughters (offered as Lots 122 & 123).

REMITALL RITA 91H (P)

NJW Endure 173D has proven himself one of the most influential sires in the Poll Hereford breed of recent time. A sire who promises eye appeal, powerful performance and breed-leading EBV's. Endure's progeny sold around the globe in 2020 and include \$100,000 sale toppers, high sires averages, stud and commercial success. Endure is a trait leader for 200, 400, 600 & SS. He ranks in the top 1% for Cwt, EMA, SSR & NSR, 5% Milk, IMF, SBM & NBT, 10% RBY, 20% Rib. We are excited to be offering some of his first drop of Australian sons as Lots 31, 39, 44, 76, 89.

CLOVERLEE HUNTER (P)

MAWARRA MISS TITANIA 054 (AI) (ET) (P)

MAWARRA MISS TITANIA 023 (AI) (P)

PCL Zircon is internationally-renowned for his low birth weight and maternal breeding. Miss Titania 054's value is undisputable and her sons include two retained sires (Private Eye and international sire Showtime P277 [page 67]), \$40,000 Rhinestone N108 and Terminator Q274 (a young NJW Endure son we've used in herd). It's hard to find bulls with an EBV spread including low birth and carcase. Private Eye, with his wonderful temperament, ranks in the top 1% of the breed for RBY, 5% Milk, Cwt & EMA. His first three young sons sold to \$6,000 at our 2020 Sale and three daughters sold at our Ladies Day 2020 Sale to \$12,500, averaging \$8,200. He is represented by sons and daughters again in this sale (see Lots 29, 35, 41, 83, 85, 86, 90, 118 & 120).

GLENTREVOR ROCKET D016 (AI) (P)

GLENTREVOR MARITANA F240 (P)

GELNTREVOR MARITANA C925 (AI) (P)

Wallace was an easy-doing, structurally-sound sire, perfect for heifer joining. A trait leader for GL, BW & IMF, he ranks in the top 1% for CEDir, CEDtrs, SBM, 5% Rump, SSR, NSR & NBT, 15% SS, DC & Rib. At Mawarra, six Wallace sons have sold to \$12,000, and he is represented in our herd by forty-five daughters. Four young sons are offered to you in this catalogue as Lots 80, 82, 87 & 88. He is also a joining sire for the polled heifers offered in this sale.

Always on the lookout for outcross genetics to introduce to our program, we have been impressed with the performance of Storm 140077 from the renowned Maungahina stud in New Zealand. The McKenzie family rate Storm very highly "... he [Storm] has everything we strive for in a Hereford bull." His sons at Maungahina have topped two sales at \$40,000 and \$28,000. His EBVs rank in the top 10% for 600, 15% RBY, 20% 400 & Mwt. We have some very promising young sires at Mawarra and we are excited to offer you Storm's first Australian sons (see Lots 72, 73, 74, 84 & 91) in this catalogue.

 DEBARRY TABITHA T81 (P)

The breeding prowess of both Anzac E114 and DB Tabitha Y177 is well documented. These two elite Poll Herefords have combined pedigree, phenotype and performance resulting in this 'Outstanding' young sire. He was in the Herefords Australia Young Sire Program and his semen has been exported to New Zealand, the United Kingdom, and Finland. His progeny scan consistently well, he is a trait leader for SS and ranks in the top 5% IMF, 15% Rib & Rump. Outstanding's eight sons have sold to \$6,000 (x3) and his daughters have sold to \$3,500. We have nineteen daughters currently retained in herd. He is represented in this catalogue by sons and daughters (see Lots 33, 37, 38, 43, 119, 121, 125 & 126).

MAWARRA MINERVA 1020 (AI) (H)
 MAWARRA MINERVA 914 (AI) (H)

Displaying the carcass and overall quality we expect of the Evolution sons, Indulge has always been a standout. We love our Jasper females with their do-ability, volume/depth, great milking, and excellent udder shape. They were exceptional during the recent drought, maintaining their body condition while rearing their calves. Indulge is Minerva 1020's first calf. His full brother will be offered in 2022. Structural Assessment Scores

The Mawarra herd has always been subject to our own strict evaluation program to assess structural soundness. In line with our objective to record and report on all traits relative to selection, we include for your information an independent structural evaluation. Liam Cardile, BEEF XCEL, completed the structural assessment on the 14th December, 2020. For full explanations of structural table and estimated breeding values see page 6.

Description of the Genetic Test Codes

For each genetic condition, the first two letters of the code indicate the genetic condition, with the status of the animal displayed as follows:

__ F Free Indicates that the sample submitted for the animal has been tested and found to be free of the causative mutation responsible for the condition. This animal is homozygous free.

__ C Carrier Indicates that the sample submitted for the animal has been tested and found to be a carrier of the causative mutation responsible for the condition. This animal is heterozygous for the mutation, meaning that it has one mutant allele and one normal allele. This animal could pass the mutation to approximately half of its progeny.

__ FU Free Untested Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal is expected to be free of the mutation responsible for the condition but has not been tested. However, this animal has not been tested for the causative mutation and Angus Australia gives no guarantee as to the animal's free status.

___ % Carrier Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal has a chance of being a carrier of the mutation responsible for the condition but has not been tested. The higher the indicated percentage, the larger the chance the animal may be a carrier. To verify the status of this animal, Angus Australia recommends a test be undertaken prior to using this animal for breeding purposes.

__ A Affected Indicates that the sample submitted for this animal has been tested and the animal found to be homozygous for the mutation responsible for the genetic condition and has two copies of the mutant variant of the gene. Note, for some recessive conditions such as DD, not all homozygous animals may appear to display phenotypic expression of the condition.

Beast Mode B074 is a breed-leading sire. Highly sought after around the globe, his sons are consistently recorded as sale toppers. His dam is renowned as one of the best cows in the breed and we were keen to use a son to bring this maternal line into our foundation herd. The consistency of his progeny, combined with his performance, made him an easy choice to include in our AI battery.

You'll be smiling too with #mawarragenetics

Dion & Julia House, 'Poachers Run' (420 acres) located in the north-west of Tasmania, contributed the following information on their enterprise.

Dion and I, along with our three children (Ruby, Ryan & George), run a mixed farming operation consisting of 115 Black Angus/Baldy cows (spring calving) and 200 breeding ewes. Our new Hereford herd, consisting of 32 autumn calving females from Banemore, Wirruna and Mawarra Genetics, run alongside our existing enterprises.

2020 was the year!

We decided to venture into a new beginning by setting the wheels in motion to form our Hereford stud, and started looking for foundation females to form the basis of our herd.

Mawarra Genetics is playing a fundamental role in building our new enterprise, due in no small part to their strong maternal female lines. Behind every great herd you will find a cow line that is producing consistent offspring and breeding objectives, which is what we liked best about Mawarra. Our seven Mawarra females, 'The Queens', I call them, have taken Tasmania in their stride. Their milking ability, easy calving, maternal instinct, structural soundness and adaptability to our cold and wet winters is truly amazing. Above all, they are the quietest cattle to handle.

The offspring from these cows are doing very well and we are very happy with them. Our first Mawarra bull calf, a Mawarra Real Time son, was weighed on the 26th January, at 7 months of age. Weighing in at 309kg, we are very impressed with this young bull. The heifers are also exceptional and will be retained for future breeding.

Julia

Carter and his best mate, Henry the Hereford.

Georgie & Ollie are all smiles sporting their #mawarragenetics caps.

Beau visited us on our Beef Week Field Day. He was delighted with his new cap and stickers.

Gary Jones, our resident 'kid at heart' with his Mawarra Maritana 188 calf.

Hayden & Charlie were excited to receive their #mawarragenetics merchandise in the mail. The boys attended our 2020 Ladies Day Sale and, under the guidance of their Dad, and grandparents, chose three young heifers to add to their herd.

We appreciate cowboys and cowgirls of all ages sharing their photos of #mawarragenetics.

Visit our website, email or find us on the various social media platforms to share your story.

We open our female offering with one of the elite heifers of our 2019 drop, from our great Miss Titania family. We love her length, softness and femininity. Private Eye has bred us an outstanding line of heifers, the first of which calve this Autumn. One of his daughters topped the heifer section of our 2020 Ladies Day Sale at \$12,500. Miss Titania 022 has sold four sons to \$7,000 and has a daughter retained in herd.
